Minneapolis Population Growth

Sewers

The ~~St. Paul~~ Tribune

WEDNESDAY, MAY 2, 1877.

THE INVITATION TO DEATH.

We desire to call the attention of the proper authorities to a concern of the most vital importance to the health and future well being of the citizens of Minneapolis. It is a lamentable fact that there are so few sewers in the city that we can almost say with truth that Minneapolis is an undrained and unsewered metropolis. It is a well settled fact among scientists that all other provisions for the health and comfort of a city are subordinate to the one vital desideratum of adequate sewerage. It should be as much a matter of concern to afford the body politic the means of cleanliness and sweetness, as the individual body. The city should no more squat down in the midst of its accumulating filth and squalor, than an individual, imitating the habits and nature of a pig, should do so. There should be conduits threading every thoroughfare, to serve as cleansing and renewing purifiers, and insuring the atmosphere against the fetid and poisonous miasmas arising from ten thousand separate and individual stanches.

Commerce

Lock & Dam No. 1.
April 5, 1917.
Upper gauge 745.95.

*...very
objectionable...*

*...excessive gas ebullition
from sludge deposits...*

...exceedingly foul...

*...very offensive
hydrogen sulfide
odors...*

*...during the latter portion of August, numerous sludge
masses were seen in the river at and below Saint
Paul...Some of these masses were over a foot in size...*

Mississippi Park Connection

Mississippi Park Connection

Mississippi Park Connection is the official nonprofit organization for the Mississippi National River and Recreation Area (MNRRA), a unit of the National Park Service. A 72-mile-long protected corridor of the Mississippi River from Dayton and Ramsey to Hastings, MNRRA is a partnership park working in collaboration with a variety of local, regional, state, and private partners to serve visitors and protect the natural resources, history, and cultures of the Mississippi River.

As its nonprofit partner, Mississippi Park Connection welcomes all people to the Mississippi River and strengthens the Mississippi National River and Recreation Area through partnership, stewardship, and community support that helps both thrive.

Honoring 100 Years of Mississippi River Restoration

In 1926, the Mississippi River was declared effectively dead in Minnesota. A century of collective action brought it back to life. In 2026, we celebrate that progress and inspire the next 100 years of stewardship. Join us.

2026 Shanty – Sacred Water Shared Future

Is the Mississippi cleaner than it was 100 years ago?

In 1926 the river was effectively dead—a water study found only 3 living fish in the region's 50 miles of river. 100 years later, we stand on Bdé Umán to celebrate the impact of the Mississippi and the collective action and continued commitment to protect and restore. Enter our immersive river world to share what the Mississippi means to you. Repopulate the water with your own fish and learn more about the history of this vital waterway.

What does the Mississippi River mean to you?

Met Council's Role in the Health of the Mississippi River

Regional thinking

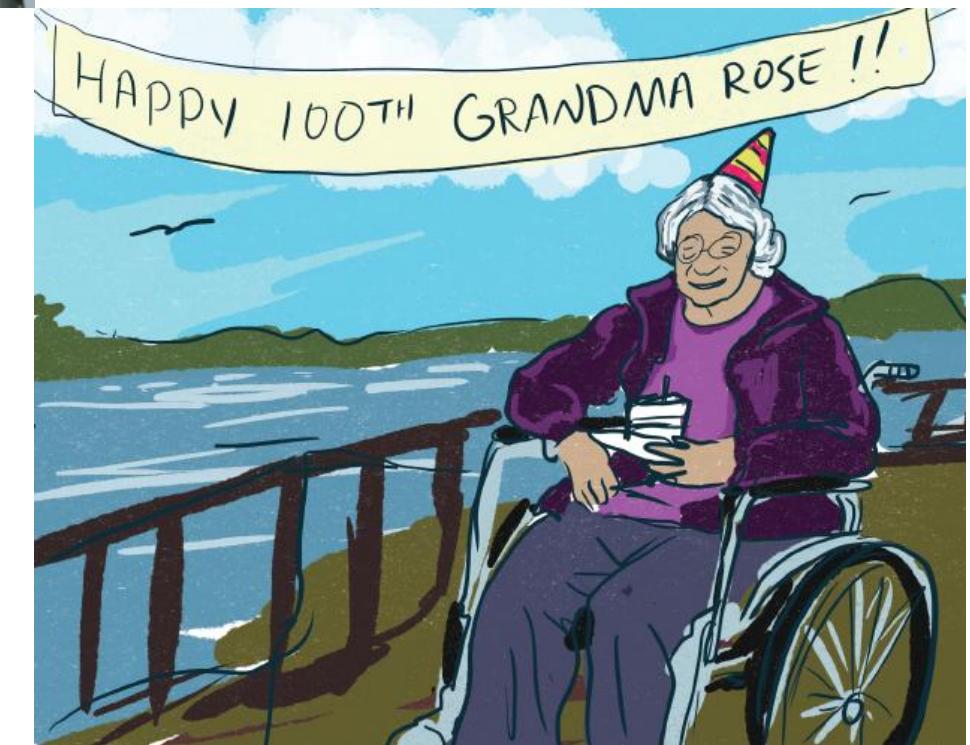

- High-quality water is essential for a healthy environment, thriving economy, and public health
- Regional collaboration works
- Infrastructure is long-lasting community service
- Building on a century of success to create sustainable communities

ES + Sacred Water Shared Future

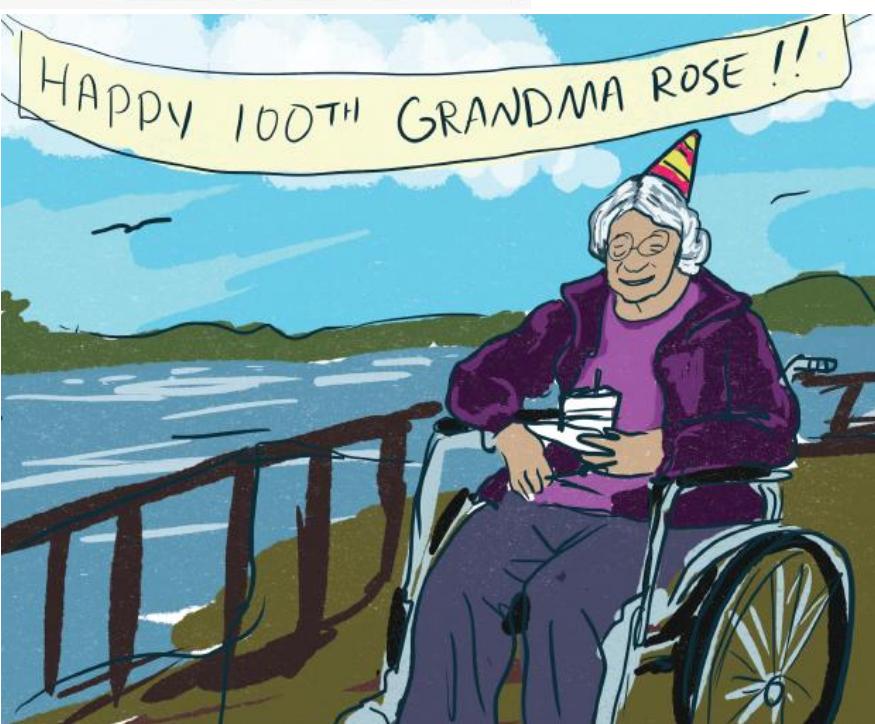

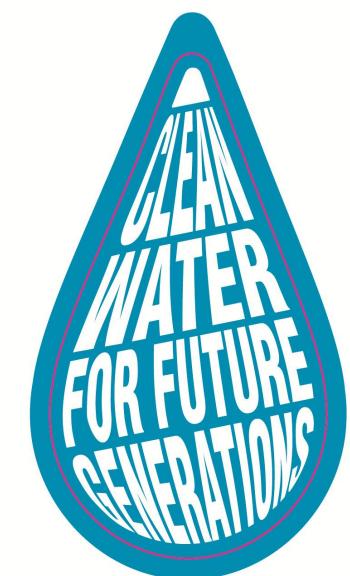

Plans for 2026

- New and tailored outreach tools
- Staff engagement and pride
- Collaboration with partners and other divisions
