

# Federal Roadway Safety Performance Measures

2026 Target Adoption

Jed Hanson

December 2025

[metro council.org](https://metro council.org)

# Contents

Performance measurement overview	2
Regulatory requirements	7
Methodology options	9
Performance assessment	14
Next steps and discussion	23

# Presentation objective

- **Inform** on status of measures not subject to action this year
- **Seek recommendation** of revisions to the federal safety performance measure

# Three buckets of measures

## Federal measures

- Reflect federal priorities
- Narrower set of measures specific to federal programs
- Required by statute or regulation
- More defined methods, reporting, and update cycles

## State measures

- Reflect statewide priorities
- Larger set of measures specific to Minnesota's transportation system
- Some required by state law
- Some require annual report

## Regional measures

- Reflect regional priorities
- Defined primarily in the Transportation Policy Plan, limited statutory definition
- Some similar or same as federal or state measures
- Required before major TPP updates

# Measures by mode and rule

	Roadways	Transit
Safety	<ul style="list-style-type: none"><li>• Fatalities</li><li>• Serious injuries</li><li>• Non-motorized fatal and serious injuries</li></ul>	<ul style="list-style-type: none"><li>• Fatalities</li><li>• Injuries</li><li>• Assaults on workers</li><li>• Major safety/security events</li></ul>
Asset management	<ul style="list-style-type: none"><li>• Pavement condition</li><li>• Bridge condition</li></ul>	<ul style="list-style-type: none"><li>• Rolling stock and equipment</li><li>• Facilities</li><li>• Infrastructure</li></ul>
Reliability	<ul style="list-style-type: none"><li>• Travel time reliability</li><li>• Freight reliability</li><li>• Excessive delay</li><li>• Non-SOV travel</li></ul>	<ul style="list-style-type: none"><li>• Distance between mechanical failures</li></ul>
Air quality	<ul style="list-style-type: none"><li>• Emissions reductions</li></ul>	<ul style="list-style-type: none"><li>• No measures</li></ul>

# Update frequency

	Roadways	Transit
Safety	<ul style="list-style-type: none"><li>• Adoption and reporting every year</li></ul>	
Asset Management	<ul style="list-style-type: none"><li>• Adoption every 4 years</li><li>• Reporting and optional adjustment every 2 years</li></ul>	<ul style="list-style-type: none"><li>• Transit providers report</li><li>• Targets adopted when prompted by actions of transit providers</li></ul>
Reliability	<ul style="list-style-type: none"><li>• Adoption every 4 years</li><li>• Reporting and optional adjustment every 2 years</li></ul>	
Air Quality	<ul style="list-style-type: none"><li>• Not applicable – in attainment</li></ul>	<ul style="list-style-type: none"><li>• No measures</li></ul>

Federal requirements:

# Purpose and measures

## Purpose

- Inform planning and programming to reduce fatal and serious injuries
- Track performance of the Highway Safety Improvement Program (HSIP)

## Measures

- Number of all fatalities
- Rate of all fatalities per 100 million vehicle miles travelled (VMT)
- Number of all serious injuries
- Rate of all serious injuries per 100 million VMT
- Number of non-motorized fatal and serious injuries

Federal requirements:

# MPO specific requirements

## Target setting

- Must set a target for each measure
- May establish metro-specific targets or agree to support statewide targets
- Must be set annually by February 27

## Assessment

- FHWA does not assess progress on MPO targets
  - No funding implications for MPO targets
- FHWA does assess statewide targets set by DOTs
  - MPO targets do not affect statewide targets
  - States not making significant progress must obligate baseline HSIP apportionment for safety only and develop implementation plan

# Effect of the roadway safety targets

- These targets provide summary-level, **reactive assessment** of regional safety performance.
- The targets **inform policymaker conversations** about the general direction of regional safety performance, and they can help safety professionals and advocates elevate the issue.
- Planning and programming processes use **more detailed measures** to address safety in transportation investments, the primary safety lever for metropolitan planning organizations (MPOs).
- Region-wide targets have **limited applications** in project implementation, and they do not set requirements for regional funding processes.

# Why change the method?

## The plans that inform target methodology have been updated.

- Regional targets have been decreasing on a straight line towards a medium-term statewide goal set in the Minnesota Strategic Highway Safety Plan.
  - The latest SHSP held over the 2025 statewide goal to 2030. Basing regional targets on the 2030 goal would hold metro targets flat through 2030.
- The Imagine 2050 Transportation Policy Plan sets an objective to eliminate deaths and serious injuries on our roadways.
  - Setting a target based on the plan horizon is clearer to communicate and consistent with previous discussions indicating policymaker desire to work towards continuous improvement.
  - Slight preference for TPP-basis among TAC Planning and safety experts that these options were screened with. Both indicated target basis is ultimately a policy choice.

# Measure options

	Option A. Hold Flat	Option B. Zero by 2050
Method	<ul style="list-style-type: none"><li>• Reduce previous year's target towards SHSP goal</li></ul>	<ul style="list-style-type: none"><li>• Reduce previous year's target towards zero by 2050</li></ul>
Effect	<ul style="list-style-type: none"><li>• Targets hold flat through 2030 because 2025 SHSP goal held over to 2030</li></ul>	<ul style="list-style-type: none"><li>• Targets continue declining, though more slowly than 2021-2025 period</li></ul>
Considerations	<ul style="list-style-type: none"><li>• Maintains tie to SHSP goal</li><li>• May be interpreted as lack of progress being acceptable</li></ul>	<ul style="list-style-type: none"><li>• Direct connection to regional plan</li><li>• Significant gap with actual performance</li></ul>

# 2026 targets by method

Measure	2022-2024 Avg. Performance	Option A. Hold Flat	Option B. Zero by 2050
Total deaths	159	≤ 74	≤ 71
Deaths per 100 million VMT	0.57	≤ 0.26	≤ 0.25
Total serious injuries	932	≤ 464	≤ 445
Serious injuries per 100 million VMT	3.34	≤ 1.61	≤ 1.55
Total pedestrian and bicyclist deaths and serious injuries	225	≤ 115	≤ 110

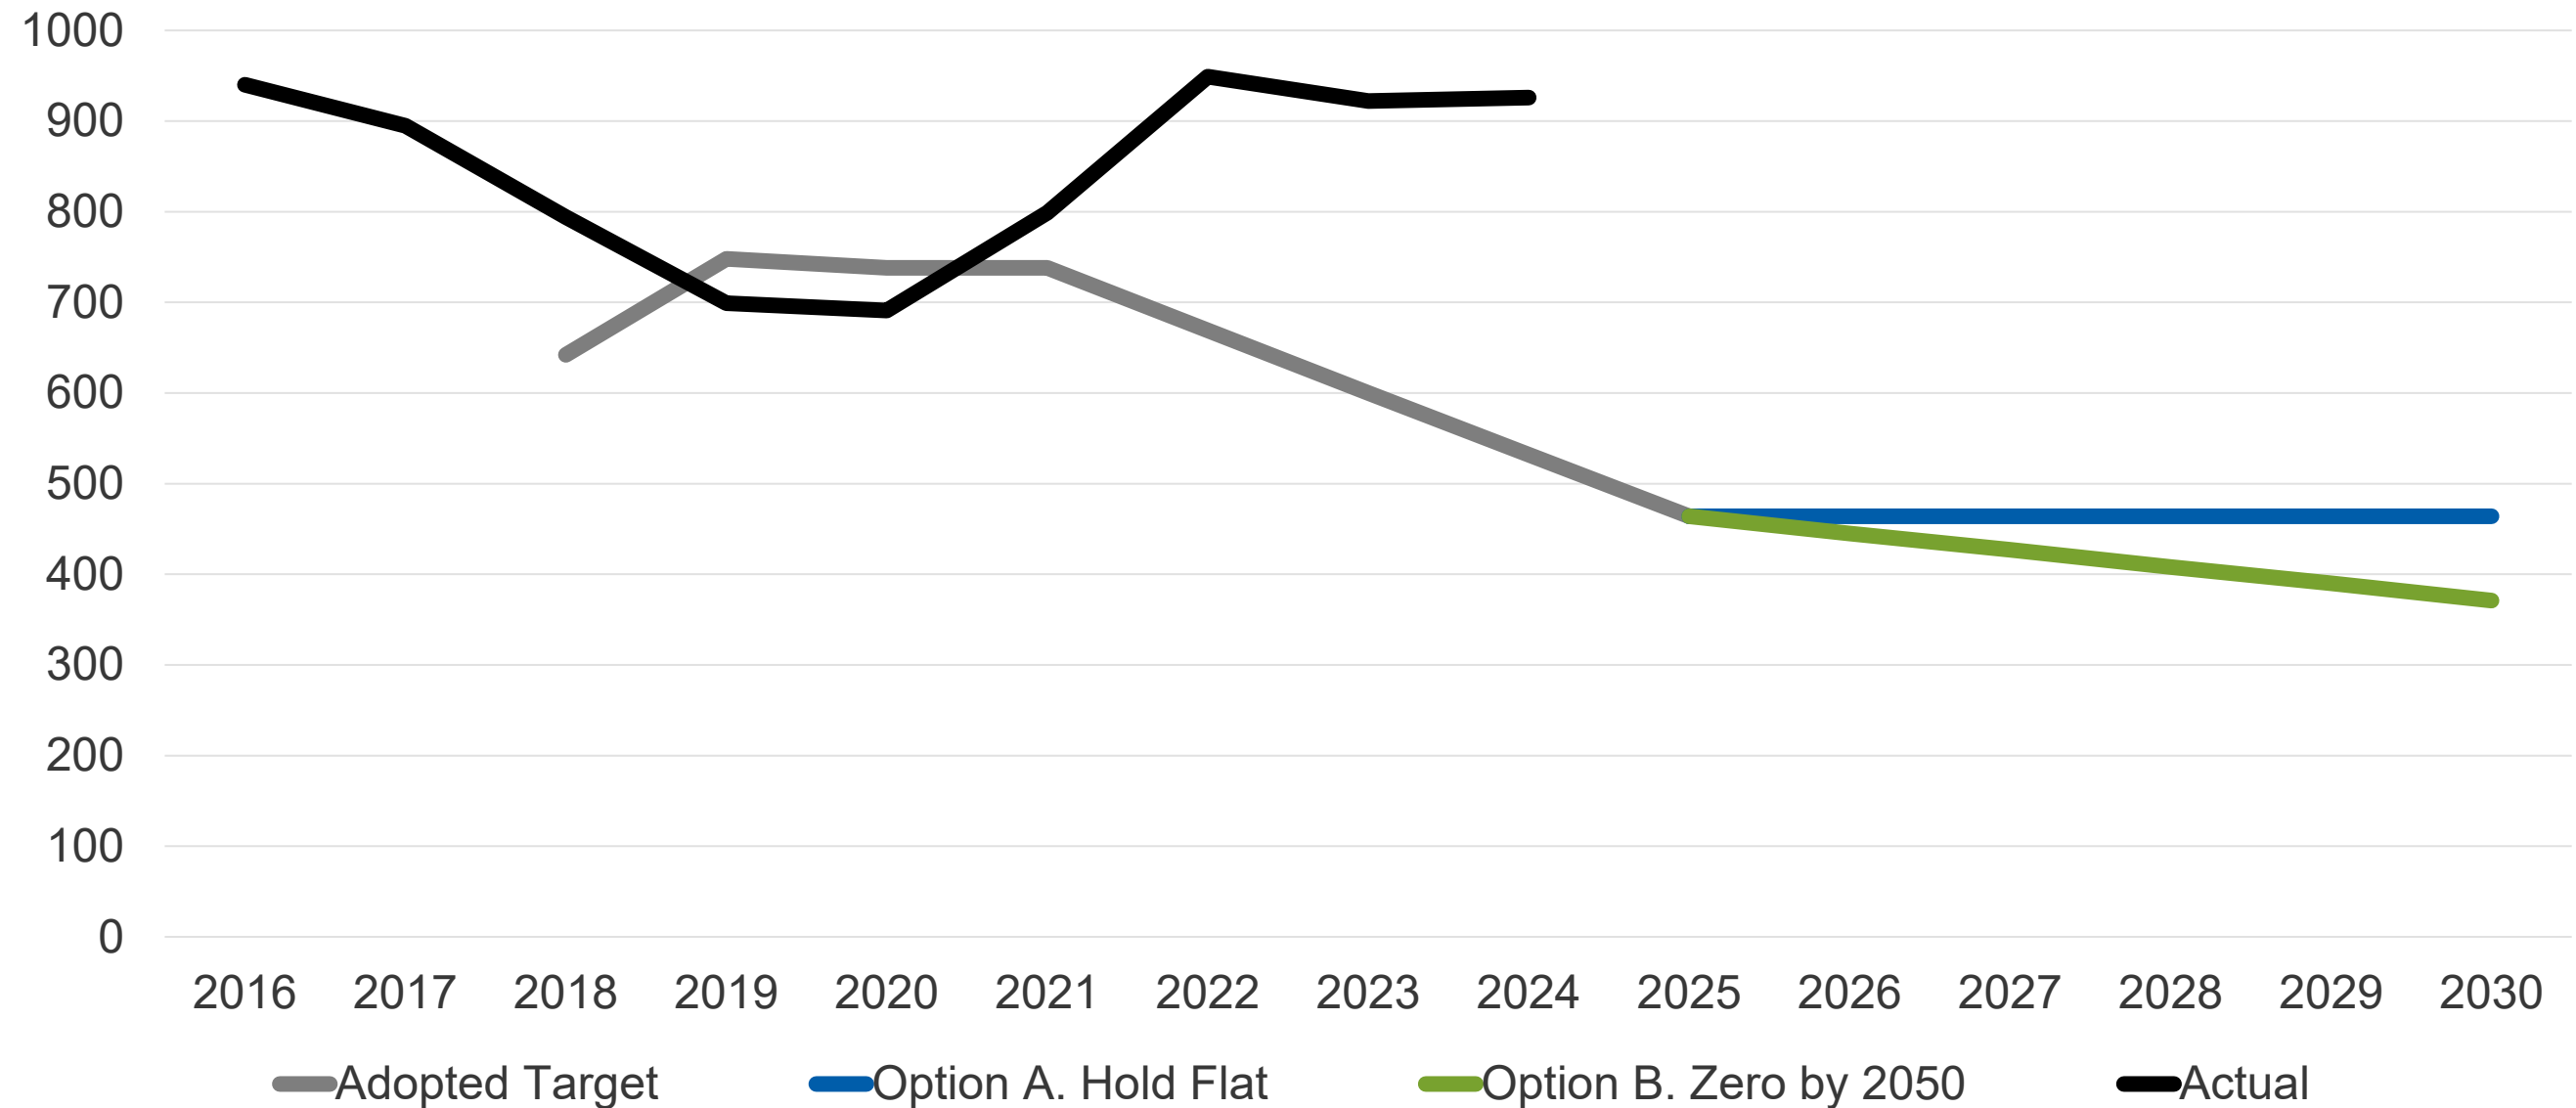

# All fatalities

# All serious injuries

Sources: MnDOT (actual injuries), Met Council (targets)

# Pedestrian and bicycle fatalities and serious injuries

Sources: MnDOT (actual injuries), Met Council (targets)

# Preliminary 2025 Performance

## Data covering 7-county metro only, January 1-October 31

- 126 fatalities
  - 8% decrease over three prior years, 18% above 2017-2019 average.
- 804 serious injuries
  - 1% increase over prior three years, 20% above 2017-2019 average.
- 210 non-motorized fatal and serious injuries
  - 4% increase over prior three years, 28% above 2017-2019 average.
  - Near-term increase is mostly worsening outcomes for pedestrians. Bicyclist outcomes in 2025 are better than recent averages, but still above pre-pandemic averages.

# Preliminary 2025 Performance

SHSP focus area	2020	2021	2022	2023	2024	Trend
Inattention	70	69	60	60	51	▼
Pedestrian	117	144	169	136	171	▲
Bicyclist	37	36	64	57	64	▲
Older Driver	87	126	168	162	177	▲

# Safe System Approach

# MPO safety planning work

## Recent

- Regional Safety Action Plan
- Regional Solicitation Evaluation
- 2050 Transportation Policy Plan

## Upcoming

- Safer Connections to Transit
- Pedestrian-Bicycle Demand Estimation Tool
- Complete Streets Local Implementation Guide
- RBTN Rural Connections

# Highlighted partner safety work

- MnDOT updated the Strategic Highway Safety Plan
- 19 local governments awarded Safe Streets and Roads for All (SS4A) grants totaling \$39.6 million
  - Apple Valley, Bloomington, Brooklyn Park, Columbia Heights, Cottage Grove, Eagan, Edina, Elk River, Fridley, Hastings, Hennepin County, Hopkins, Minneapolis, New Brighton, Saint Louis Park, Saint Paul, Shakopee, West Saint Paul, and Woodbury
  - More applications pending!
- Minneapolis and Mendota Heights speed safety camera pilots
- Local involvement in Minnesota Advisory Council on Traffic Safety

# Next steps

## Advance draft targets through adoption actions:

- December 17: TAB recommendation
- January 12: Transportation Committee recommendation
- January 28: Met Council adoption
- February 27: Deadline to submit to MnDOT

# Recommended Motion

That the Transportation Advisory Board recommend that the Metropolitan Council adopt the 2026 roadway safety performance targets, which advance a long-term goal of zero deaths:

- Number of all fatalities: no more than 71
- Fatal injuries per 100 million VMT: no more than 0.25
- Number of all serious injuries: no more than 445
- Serious injuries per 100 million VMT: no more than 1.55
- Pedestrian and bicyclist fatalities and serious injuries: no more than 110

# Thank you
