

Project schedule, surveys, and comprehensive plan outline

Greg Johnson, September 30, 2026 metro council.org

Project schedule (1/2)

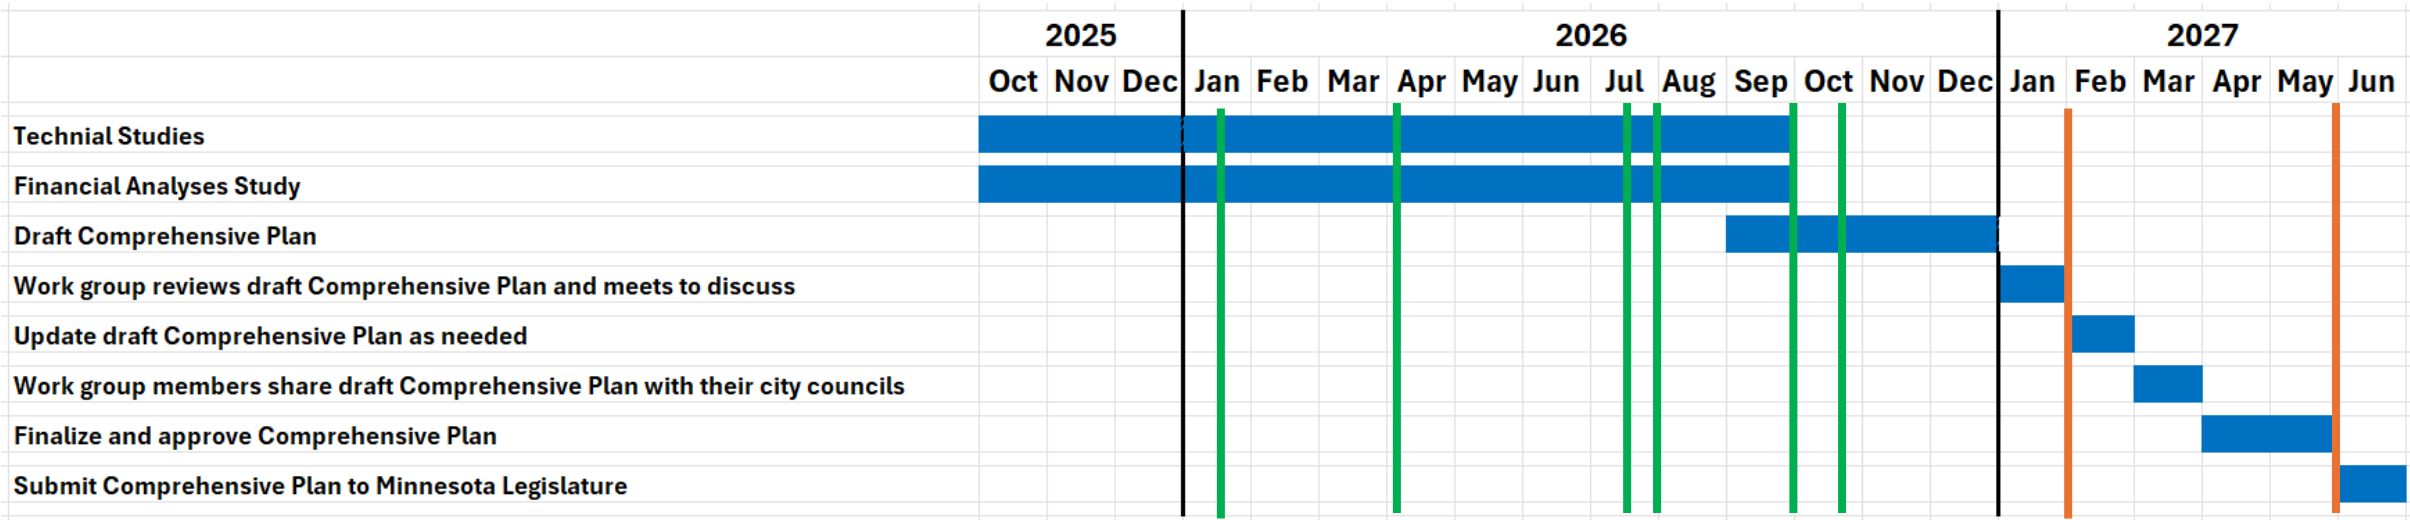

Scheduled work group meeting 

Project schedule (2/2)

Scheduled work group meeting 

Unscheduled work group meeting 

Surveys (1/3)

Rankings and questions for next survey

1. Re-rank the potential water savings solutions with stormwater reuse and water efficient plumbing fixtures included as potential water savings solutions as they relate to policies
2. Questions related to the financial analysis and possible implications as they relate to the dashboard analysis
3. Ranking of potential funding methods evaluated after completing the dashboard analysis

Surveys (2/3)

Comments for the previously completed survey

1. Option to resubmit original survey if you think the results from your own financial analysis with the dashboard changed your rankings.
2. Provide the option to weight and score the survey categories differently for each of the potential infrastructure solutions. Contact us if you would like to do this and we will send you a survey form that is set-up to do this.

Surveys (3/3)

Comments for the previously completed survey (continued)

3. Suggestion by work group member to include a lower capacity lake augmentation system (up to 780 million gallons per year). Question - Should we study and estimate the costs for this option and re-rank all the potential infrastructure solutions ?

Draft comprehensive plan outline (1/6)

Executive summary

White Bear Lake issue background

Legislation for comprehensive plan

White Bear Lake Area Work Group

Draft comprehensive plan outline (2/6)

Potential solutions evaluated and findings

- A. Converting water supplies that are groundwater dependent to total or partial supplies from surface water
- B. Reuse water
- C. Projects designed to increase groundwater recharge
- D. Other methods to reduce water use
- E. Other studies and methods

Draft comprehensive plan outline (3/6)

Funding options and financial analysis

- A. Funding methods evaluated
- B. Financial analysis dashboard and funding examples
- C. Potential cost implications to communities (local and statewide)

Draft comprehensive plan outline (4/6)

Management, operations, and ownership considerations

- A. Potential management
- B. Operational requirements
- C. Potential ownership considerations if needed

Draft comprehensive plan outline (5/6)

Work group recommendations

A. Solutions recommendations

1. Infrastructure solutions recommendation
2. Water savings solutions recommendation

B. Funding method recommendation

Draft comprehensive plan outline (6/6)

Appendices

- A. Web links to study reports and presentations
- B. Work group meeting agendas and minutes
- C. Work group member correspondence
